EXPERIENCE

GRAVIXA | FRONT END DEVELOPER
June 2022 - Present
- Built a dashboard for a shipping company used to track shipments for thousands of clients all over the world
- Built a react admin dashboard used by 100s of fitness centers across the MENA region
- built a script that scrapes top fashion brand websites and sends email alerts to the client when a new product is available

FREELANCER | FRONT-END DEVELOPER
August 2022

- Built a web app that helps epileptic patients record their episodes and immediately notify their doctors, through a separate physician dashboard.
- Built a web app for a sports analysis company that provides cutting-edge sports analytics that aims to empower the biggest athletes, clubs, federations, and entities in the sports industry to achieve their strategic goals by integrating professional knowledge, tracking, and video analysis.

PROJECTS

CARTHUB

- Full-featured E-commerce Website: Developed a comprehensive e-commerce website from scratch as a personal project, offering a seamless shopping experience for customers.
- Multiple Departments and Product Categories: Implemented a dynamic product catalog with various departments and categories, allowing customers to browse and choose products based on their preferences.
- Shopping Cart Functionality: Integrated a robust shopping cart feature that enables customers to add products, manage quantities, and review their selections before proceeding to checkout.

WASSAL

- Shipment Tracking Website: Developed a user-friendly and intuitive shipment tracking website as a personal project, allowing users to easily track the status of their shipments.
- Multilingual Support: Designed the website to support multiple languages, including Arabic, allowing users to switch between languages for a localized and personalized experience.
- Responsive Design: Developed a responsive and mobile-friendly design, ensuring optimal viewing and usability across different devices and screen sizes.
